Cassette Sized Plat Panel Detector

Simple, easy, and cost-effective Csl DR-Wired or Wireless solution

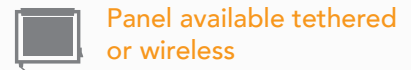

10"x12" model specifications

Tiger DR-Wired or Wireless 10"x12" is a cassette size flat panel detector available with a 10"x12" active area sensor. TigerView DR-Wired or Wireless fits into existing orthoposers and does not require a cable connection with an X-ray generator to synchronize the signals. The entire active area is prepared with the "Autosense" technology and takes care of the exposure timing.

This ultra thin and lightweight wired or wireless detector allows digitizing without modification of existing conventional imaging systems. Cable free functionality on the wireless gives the user a true wireless detector at a fraction of the cost.

Tiger DR-Wireless benefits include:
