

REX² Premium Veterinary Dental Sensors

Digital Intra Oral CMOS Sensor

Rex2 sensor is the modern veterinarian's sensor of choice. The durable Rex2 sensor with the best exposure levels requires only 1/7 the radiation of traditional X-rays. Rex2 sensor is a complete radiography system that integrates with your image management and patient management software. Rex2 sensor is versatile and allows for image adjustments in terms of brightness, contrast, gamma, and sharpness. These adjustments allow for more accurate diagnosis. Rex2 sensor and its integrated USB connection ensures fast and convenient image capture.

Rex2 sensor ensures the highest contrast resolution. This allows you to see small changes in enamel density which in turn allows for a more accurate diagnosis and better treatment plans.
