TELEVERE SYSTEMS

Can I access my images from my practice management software?

Yes, many practice management programs bridge to TigerView. Please check the following list to see if your practice management program is among them:

In some cases, these companies have an internal bridge that they may charge for. When that happens, TigerView offers a free bridge program called TigerLink, that, in many cases, allows TigerView to obtain the patient name from the PMS and then automatically open the same patient in TigerView and display his/her images.

1st Providers Choice - Internal Bridge	Eclipse To Tigerview	Periovision
Athena	Endovision	Platinum
Atlas	Epic To Tigerview	PMS Integration
